IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.

17 JAN 1910

REGISTER OF RAINFALL IN 1909

Kept at Rosamondford Aylesbeare

in the County of Devon

by A. J. Loram Cot

Rain Gauge:
Pattern
Diameter of top 5 in.
Height of top above Ground ft. 8 in.
" " " Sea Level 220 ft.

Time of Observation 9 a.m.

Nearest Railway Station:
Name Broadclyst
Distance 4m Direction N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2. BRITISH RAINFALL. 2 JAN 1911

Kept at Martinhoe Rectory

in the County of Devon 1

by R W Oldham

RAIN GAUGE	Pattern	Round
	Diameter of top	5 in.
	Height of top above Ground	2 ft. 3 in.
	" " " Sea Level	808 ft.

Time of Observation 9.30 am

Nearest Railway Station: Name Woody Bay L & B Rly; Distance 2 m Direction SSE

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

RE 1910

FORM A2. BRITISH RAINFALL.
30 JAN 1911

Kept at Abbotts Hill Beaford 3

in the County of N. Devon

by Jas. Stuckey Esq

RAIN GAUGE
Diameter of top 5 in.
Height of top above Ground 1 ft. 3 in.
" " " Sea Level 380 ft. (Wainwright)

Time of Observation —

Nearest Railway Station
Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
3 JAN 1911

Kept at Halwill Manor Beaworthy.

in the County of Devonshire 2

by C. J. Newman.

RAIN GAUGE { Pattern —
Diameter of top 5 in.
Height of top above Ground 1 ft. — in.
" " " Sea Level 535 ft.

Time of Observation 8 · a. m.

Nearest Railway Station { Name Halwill Junct
Distance 1¼ miles Direction North East

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Name Bideford
Distance ¼ m. Direction W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.

16 JAN 1911

Kept at Beachcroft, Bideford

in the County of Devon 3

by A. H. Hobhouse

RAIN GAUGE
Pattern 2" copper gauge Casella
Diameter of top 2 in.
Height of top above Ground 1 ft. — in.
" " " Sea Level 125 ft.

Time of Observation 9 a.m

Nearest Railway Station
Name Bideford
Distance 3/4 m Direction E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Nearest Railway Station
Name Bideford
Distance 3 mil Direction W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2. BRITISH RAINFALL.

15 APR 1911

Kept at Colehays Gardens

in the County of Devon 5

by G. Heath

Rain Gauge:
Pattern
Diameter of top 6 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 400 ft.

Time of Observation 9 a.m.

Nearest Railway Station: Name ~~Bovey~~ Distance 1½ m Direction E

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Distance 6½ miles. Direction S. E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2. BRITISH RAINFALL.

REGISTER OF RAINFALL IN 1909

Kept at Challacombe.

in the County of Devon. N. 2

by Ilfracombe Urban District Council per A. Leworthy

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground One ft. ✓ in.
" " " Sea Level 815 ft. O.D.

1849

Time of Observation 9 am

Nearest Railway Station
Name Blackmoor. Lynton & Barnstaple R
Distance 4 mile Direction N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

No. of wet days.	11	13	11	22	17	20	13	13	8	27	19	28	202

Total number of wet days.

*snow not thawed

INSTRUCTIONS.

The rainfall, recorded if possible at 9h. a.m., should be entered to the day *previous* to that on which it is measured. If the daily record is unavoidably interrupted, the two or three days' accumulation should be bracketed. Days without rain should be marked with a dash — . When the fall is less than ·01in. the water should be thrown away. Notes on Thunderstorms, Halos, and other Meteorological Phenomena of like nature are welcome, and may be inserted on the blank page opposite.

Observers are requested to send their returns as soon as possible after the end of the year to H. Stilwell, Esq., Steepleton Manor, Dorchester.

REGISTER OF RAINFALL IN 1909

Excd fm

FORM A2. BRITISH RAINFALL.

7 JAN 1910

Kept at Chardstock Vicarage

in the County of Devon

by Rev. A. Lewis

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground — ft. 11 in.
" " " Sea Level 320(1) ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Chard
Distance 3 miles Direction N.N.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

REG 10

FORM A2.
BRITISH RAINFALL
20 JUL. 1911

Kept at Barne House. Christow

in the County of Devon

by Harford J Lowe

RAIN GAUGE
Pattern Casella
Diameter of top 5 in.
Height of top above Ground 1 ft. — in.
" " " Sea Level 410 ft.

Time of Observation 9-30 a.m.

Nearest Railway Station
Name Christow
Distance 1¼ mile Direction N

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

FORM A2 BRITISH RAINFALL.

4 JAN 191

REGISTER OF RAINFALL IN 1910

Kept at Coplestone House [illegible] Colebrooke.

in the County of Devon 6

by Miss Mary Pope

RAIN GAUGE
Pattern Snowdon. No 3155
Diameter of top 5 in.
Height of top above Ground — ft. 11 in.
" " " Sea Level 315 ft. approx.

Time of Observation 9 a.m.

Nearest Railway Station
Name Copplestone.
Distance 1/4 mile Direction South.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.

3 JAN 1911

Kept at Corzton Rectory

in the County of Devon

2

by Rev. H. N. Fowler

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. 6 in.
" " " Sea Level 400 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Corzton
Distance 3/4 m. Direction W

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2. BRITISH RAINFALL.

16 1911

Kept at Okefield Crediton

in the County of Devon

6

by Seymour & Pope

RAIN GAUGE
Pattern Negretti & Zambra's circular gauge
Diameter of top 5 in.
Height of top above Ground 1 ft. - in.
" " " Sea Level 325 ft.

Time of Observation 9·30 A.M.

Nearest Railway Station
Name Crediton
Distance 1 mile Direction S.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

REGISTER OF RAINFALL IN 1910

FORM A2. BRITISH RAINFALL.

20 APR 1911

Kept at The Lawn Dawlish

in the County of Devon 5

by D. F. C. Churchward

RAIN GAUGE: Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 17.59 ft.

Time of Observation 6 P.M.

Nearest Railway Station: Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.

9 AUG 1910

REGISTER OF RAINFALL IN 1909

Kept at The Hurrows Haldon

in the County of Devon

by S. J. C. Churchward.

Rain Gauge: Pattern

Diameter of top 5 in.

Height of top above Ground 1 ft. – in.

" " " Sea Level ft.

Time of Observation 9 am

Nearest Railway Station: Name

Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

New Years day 1907

The months of Aug & Sept
I have not kept correct
& they were in each case
entered a day late -
which I much regret
i.e. what was recorded
on the 2nd August to have
been recorded on the 1st
the 3rd on the 2nd the 4th
on the the 3rd & so on.

Yours faithfully

J P Roberts

K/1000/11/05. EDWARD STANFORD, 12, 13, & 14 LONG ACRE, W.C. Price, on extra tough paper. 3d.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.

21 JAN 1911

Kept at Otterton Vicarage

in the County of Devon. 7

by The Rev. R. Seymour

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. – in.
„ „ „ Sea Level 62 ft.

Time of Observation 9 am

Nearest Railway Station
Name East Budleigh
Distance ¼ mile Direction West

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.

8 APR 1912

REGISTER OF RAINFALL IN 1905.

Kept at Filleigh Castle Hill Gardens

in the County of Devon

by Lady Fortescue

RAIN GAUGE
Pattern
Diameter of top in.
Height of top above Ground ft. in.
" " " Sea Level ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

Form A2.
British Rainfall.

Kept at Ilfracombe

in the County of Devon

by Ilfracombe Urban District Council

Rain Gauge: Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground one ft. — in.
" " " Sea Level 395 ft. O.D.

Time of Observation 9 am

Nearest Railway Station: Name Ilfracombe
Distance 1¼ m. Direction S.S.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
24 FEB 1911

Kept at Blackadon Asy Ivybr
in the County of Devon 3
by Dr. W. H. Bowes pr W. Pray

RAIN GAUGE
Pattern M.O.
Diameter of top 5 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 607 ft.
Time of Observation 9 am
Nearest Railway Station
Name Wrangaton
Distance 2 Miles Direction W

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.
